PROFESSIONAL SUMMARY

Recent Computer Science Engineering graduate specializing in full-stack development (MERN/Next.js) and cloud infrastructure. Architected highly scalable university platforms, including a convocation portal managing 100,000+ concurrent users and an admission system serving 1,000+ students. Adept at resolving complex backend challenges, optimizing deployment pipelines, and engineering robust, high-performance web applications.

EXPERIENCE

Parul University

Software Development Intern

Vadodara, Gujarat

July 2025 – Dec 2025

- **Parul University Convocation Portal (Oct 2025 – Dec 2025):** Spearheaded the end-to-end development of a high-availability convocation management platform, collaborating with mentor Mr. Mohit Rathod, to effectively process 100,000+ concurrent users with zero downtime during critical traffic surges. Engineered robust server infrastructure leveraging Nginx reverse proxying and advanced load balancing techniques—hosted on a high-specification server (45 vCPU, 45GB RAM) accommodating both frontend and backend—to guarantee 100% uptime and streamline complex administrative workflows.
- **Live University Admission Portal (July 2025 – Oct 2025):** Architected and deployed a comprehensive full-stack admission portal for 1,000+ incoming students, centralizing academic record management and streamlining institutional onboarding. Devised an intuitive, student-led data verification workflow that diminished manual faculty entry errors by 95% and conserved 50+ administrative hours per enrollment cycle.

EDUCATION

B.Tech in Computer Science Engineering

Parul University, Vadodara, Gujarat

2022 – 2026

CGPA: 7.0/10.0

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python, C, C++, Go
- **Frontend:** React.js, Next.js, Tailwind CSS, Vite, HTML5, CSS3
- **Backend:** Node.js, Express.js, RESTful APIs, Bun.js, Elysia
- **Databases:** MongoDB, Firebase, PostgreSQL
- **Tools & DevOps:** Nginx, Git, GitHub, Vercel, Docker, Postman, FFmpeg, Linux
- **Soft Skills:** Problem-Solving, Team Collaboration, Agile Methodology, Time Management, Adaptability

OTHER PROJECTS

Personal Developer Portfolio

Jan 2026

Tech Stack: Next.js, Tailwind CSS, Vercel — Live URL: kaustubhbagale.me

- Designed and engineered a dynamic, high-performance developer portfolio utilizing Next.js to effectively exhibit professional credentials, technical competencies, and software projects.
- Implemented sophisticated, mobile-first responsive architectures and rigorous asset optimization, yielding sub-second load times, superior accessibility, and 10/10 SEO rankings.

Pinaka (Terminal-Based Speed Typing App)

Feb 2026

Tech Stack: Go (Golang), Bubble Tea — Repo: github.com/baggiii1013/pinaka

- Engineered a lightweight, highly responsive Text User Interface (TUI) application in Go for speed typing tests, featuring real-time WPM (Words Per Minute) calculation and accuracy tracking.
- Optimized terminal rendering and key-event processing to achieve sub-millisecond input latency, ensuring a seamless, cross-platform, and distraction-free user experience.
